22 April 1974

MEMORANDUM FOR THE RECORD

SUBJECT: Meeting with Mr. Gordon T. Yamada, GSA

1. On 18 April, at my request, I was visited by Mr. Gordon T. Yamada, Director, Office of Management Systems and Special Projects, Office of Federal Management Policy, General Services Administration.

2. Our conversation followed the path of my explaining to Mr. Yamada the applicable portions of the current CIA legislation which prohibits disclosure of Agency budget items, et cetera, and to how this relates to various classification of management items on which GSA requires us to report. Mr. Yamada seemed quite receptive to the idea that these items when submitted to GSA for subsequent public reporting could add up to rather serious security violations; and he agreed that where we felt the information required by GSA was sensitive, he would be willing to come out to be briefed orally on the matter. He understood that we were not using security as a means of not complying with Federal Government regulations and that we would be in a position to demonstrate this to him at our mutual convenience.
